HYDRAULIC FILTRATION

FILTREC[®]
Technical Filtration

serie
CORELESS

Serie Coreless

Elementi filtranti Coreless

Coreless hydraulic filter elements

CORPO FILTRO

Descrizione:

Le cartucce Coreless garantiscono una lunga durata nel tempo, grazie alla tipologia degli strati filtranti impiegati "dual phase", mantenendo costante l'efficienza filtrante per tutta la durata del filtro.

La configurazione dello strato filtrante è stata studiata appositamente per mantenere un'ottima stabilità anche se sottoposto a variazioni cicliche di portata, la protezione esterna in materiale plastico nonché il rinforzo delle pieghe, salvaguardano l'elemento da picchi di flusso/pressione e contaminanti.

La struttura "metal free" e la bassa percentuale di collanti utilizzati aiuta l'ambiente (meno rifiuti e possibilità di schiacciamento/incenerimento* dopo l'uso).

La serie Coreless è intercambiabile alla serie Pall HC8304, HC8314, HC8904, HC9404, HC9604, HC4704, HC9104, HC9804.

Caratteristiche:

- Filtraggi assoluti (Beta \geq 1000): 4.5 μm_0 / 7 μm_0 / 12 μm_0 / 22 μm_0
- Ottima resistenza alla variazioni cicliche di portata e partenze a freddo (elevate viscosità)
- Configurazione "metal free"
- Possibilità di schiacciamento/incenerimento* dopo utilizzo
- Facile installazione e rimozione
- Peso ridotto, fino al 60% inferiore rispetto ad una cartuccia convenzionale

* L'incenerimento dovrà essere effettuato secondo le leggi vigenti nel paese di utilizzo dell'elemento.

FILTER HOUSING

Description:

Coreless hydraulic filter elements guarantee a long service interval due to the innovative filter media "dual phase" and constant level of efficiency during cartridge life.

Media packs are developed in order to maintain good stability also under high flow fatigue variation, the external plastic cage and pleat reinforces give an additional help to the media versus contaminants and flow/pressure peaks.

Metal free structure and less adhesives used help the environment (less waste and crushable/incinerable* possibility).

Coreless filter element series are interchangeable to Pall HC8304, HC8314, HC8904, HC9404, HC9604, HC4704, HC9104, HC9804.

Features:

- 4.5 μm_0 / 7 μm_0 / 12 μm_0 / 22 μm_0 microglass fibers absolute filtration (Beta \geq 1000)
- Very good resistance to flow fatigue variation and cold start (high viscosity fluids)
- Metal free configuration
- Crushable/incinerable* possibility after use
- Easy installation/removal
- Weight reduction, up to 60% less than a standard element

* Incineration must be done according to applicable laws in the country where element has been used
